

# Next Generation Test Automation Platform Powered by Visual AI

Increase quality, accelerate delivery, and reduce cost with the world's most intelligent automation platform.

**Visual AI** replicates the human eye and brain, looks at every screen and page in seconds, and spots app regressions that truly matter.

Our core products, Applitools Eyes and Ultrafast Grid, integrate seamlessly with your existing stack, allowing teams to fully automate their end-to-end UI testing and monitoring through a single, integrated AI-powered platform that provides:

- Functional Testing
- Visual Testing
- Web, Mobile, and UI/UX Testing
- Cross Browser & Device Testing
- Compliance Testing
- Localization, Accessibility, PDF Testing, & More

## Over 350 Brands Rely on the Applitools Ultrafast Test Cloud

10 of 10 Top Software Companies in the World. 5 of 10 Top Banks in the US. 4 of 10 Top Pharma Companies in the US

“

Accelerating time to production, without sacrificing quality has become table stakes for Agile DevOps professionals. The team at Applitools has taken a fresh approach to cross browser testing with the Ultrafast Grid. While traditional cloud testing platforms are subject to false positives and slow execution, Applitools' unique ability to run Visual AI in parallel containers can give your team the unfair advantage of stability, speed, and improved coverage. This modern approach to testing is something that all DevOps professionals should strongly consider.”

Igor Draskovic | VP, Developer Specialist | BNY Mellon

## Visual AI: ROI data from our customers

Traditional testing platforms simply cannot match our accuracy, speed, and coverage.

**5.8x**  
FASTER

Visual AI allows tests to be authored 5.8x faster compared to the traditional code-based approach.

**5.9x**  
MORE EFFICIENT

Test code powered by Visual AI increases coverage via open-ended assertions and is thus 5.9X more efficient per line of code.

**3.8x**  
MORE STABLE

Reducing brittle locators & labels via Visual AI means reduced maintenance overhead.

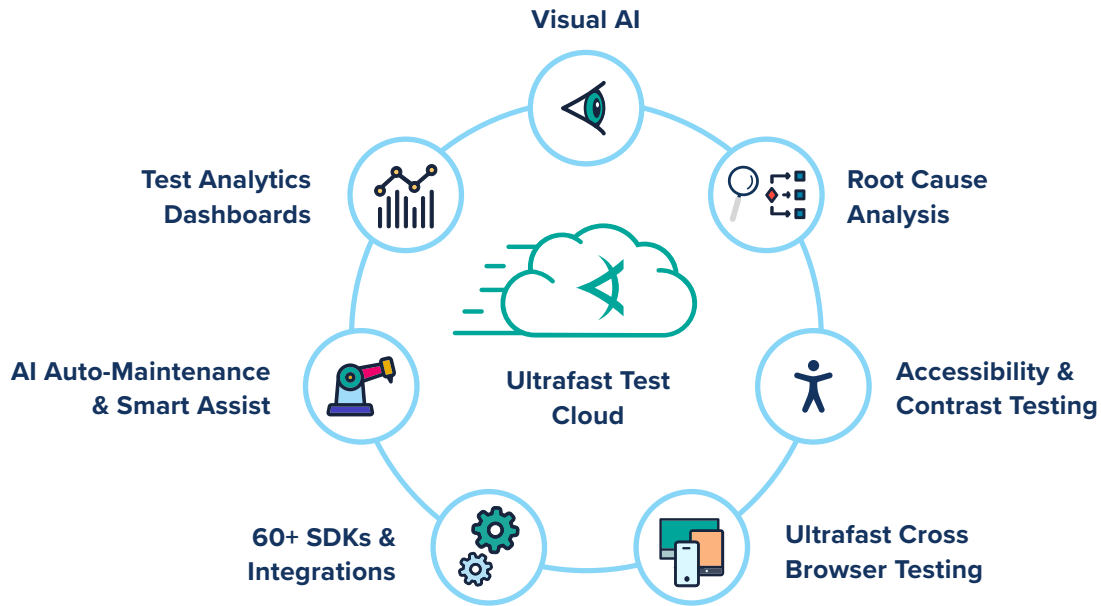

**45%**  
MORE BUGS CAUGHT

Open-ended assertions via Visual AI are 45% more effective at catching bugs.

## One Intelligent Platform - AppliTools Ultrafast Test Cloud

Adding AppliTools Visual AI to your existing test automation framework allows quality teams to release perfect apps faster and at a reduced cost.

**AppliTools Eyes** allows you to quickly add Visual AI to your existing tests. Visual AI replicates the human eyes and brain, looking at every screen of your web and mobile applications and instantly spotting functional & visual regressions, while ignoring differences that don't matter.

**AppliTools Ultrafast Grid** represents the next generation of cross browser testing. With Ultrafast Grid, you run your functional & visual tests once locally and it instantly renders all screens across all combinations of browsers, devices, and viewports. This is all done with unprecedented security, stability, and speed, and with virtually no setup required.

## Integrates Seamlessly With Everything in Your Pipeline

Over 50 SDKs and integrations targeting every UI technology and programming language.
